

# CYBER PROTECTION GROUP

---

**To:** Implex

**Subject:** Security Assessment Addendum

**Date:** March 15, 2022

As of March 15, 2022, Cyber Protection Group did not discover any vulnerabilities that appear on Implex's web application, <https://global.quikcast.tv/>. Implex currently implements appropriate measures and controls in order to mitigate the reported vulnerabilities. These vulnerabilities are described in the report delivered on February 1, 2022. The vulnerabilities that the client resolved are as follows:

1. Session Token in URL
2. Password Field with Autocomplete Enabled
3. Strict Transport Security Not Enforced
4. TLS Cookie Without Secure Flag Set
5. Cross Domain Referer Leakage
6. Cacheable HTTPS Response
7. Mixed Content
